DOLYNSTER SANTOS

SOFTWARE ENGINEER | SaaS, DeFi, Business Platforms & Automation

Email: dolynster@gmail.com | Mobile: +63 997 698 9307 | Telegram: @dolynster

PROFESSIONAL SUMMARY

Software engineer with 10+ years of experience building scalable production-ready web applications and AI-powered systems. Strong foundation in full-stack development (React/Next.js, Node.js, Python/Django), cloud services (AWS, Microsoft Azure, Google Cloud) and data-driven architectures (RAG, OCR, ETL pipelines).

Proven ability to optimize performance, improve user engagement, and deliver end-to-end solutions in fast-paced environments. As a business-oriented software engineer, my aim is to help startups and SMBs turn ideas into production solutions.

SKILLS

Programming Languages: Python, JavaScript(ES6+), TypeScript, Java, SQL, Rust, Solidity
Front-end: React/Next.js, Tailwind CSS, Material UI
Back-end: Node.js/NestJS, Django, Laravel, RESTful APIs, FastAPI
Database: PostgreSQL, MySQL, MongoDB, Redis, Prisma, Pinecone, Elasticsearch
Blockchain: Hardhat, Foundry, Anchor, OpenZeppelin, Web3.js, Ethers.js, DEX, Tokenomics
DevOps & Cloud: Git, GitHub Actions, CI/CD(Docker, Kubernetes), AWS, Azure, GCP
Machine Learning: TensorFlow, Scikit-learn, PyTorch
RAG: LangChain, LangGraph, LlamaIndex
LLM API: OpenAI, Google Gemini, Together AI, Fireworks AI, Hugging Face
AI Assistive Tools: ChatGPT, Claude AI, Llama, Github Copilot, Perlexity, Higgsfield AI, CodeRabbit

PROFESSIONAL EXPERIENCE

AI | Full-stack Engineer / *Wolfspeed (Sep 2024 - Aug 2025)*

- Designed and deployed production AI applications using FastAPI, LangChain, Open AI APIs, and vector databases.
- Built Retrieval-Augmented Generation(RAG) pipelines that improved response accuracy and reduced hallucinations for enterprise knowledge systems.
- Developed AI agents to automate multi-step business workflows, reducing manual effort and improving operational efficiency.
- Optimized cloud infrastructure and inference services, reducing API latency by 40% while lowering infrastructure costs.

- Led a team of eight engineers delivering scalable AI services and collaborating with product managers to ship customer-facing AI features.

AI Developer | *Fisker Inc. (Feb 2024 - May 2024)*

- Built machine learning pipelines for real-time sentiment analysis with high prediction accuracy.
- Implemented privacy-preserving machine learning techniques for healthcare applications.
- Integrated AI-powered features into the company's SaaS platform, improving customer retention and user satisfaction.
- Developed backend services using Python, FastAPI, PostgreSQL, and Docker for scalable AI deployment.

Blockchain Developer | Smart Contract Engineer | *Metararity (Mar 2020 - Dec 2023)*

- Built a custom DEX platform that processed over $816M in trading volume annually with a TVL of $3.7M and 100+ liquidity pools.
- Architected, developed, optimized and maintained smart contracts for the user-facing NFT marketplace using Solidity, Hardhat, and OpenZeppelin.
- Led a team of three smart contract developers auditing and delivering secure and scalable smart contracts for custom lending platforms and bridges between different blockchain networks.
- Developed 40+ custom smart contracts for staking, yield farming and LP tokens using OpenZeppelin.

Full Stack Developer | *Shift Technologies (Apr 2018 - Dec 2019)*

- Developed a microservices-based e-commerce platform using Next.js, Node.js, GraphQL, and PostgreSQL.
- Reduced page loading time by 30% through front-end optimization and API performance improvements.
- Designed GraphQL APIs supporting high-volume production traffic.
- Implemented CI/CD pipelines using GitHub Actions and Docker, reducing deployment time from 2 hours to 28 minutes.
- Collaborated with cross-functional teams to integrated machine learning recommendations into customer facing products.

Junior Full Stack Developer | *NanoString Technologies (Mar 2017 - Dec 2017)*

- Built and maintained RESTful APIs using Node.js, Django, Laravel, PostgreSQL and MongoDB.
- Migrated legacy JavaScript applications to TypeScript, improving maintainability and reducing production bugs.
- Developed automated testing pipelines using Jest and Cypress, significantly increasing code coverage.
- Collaborated with front-end developers to deliver responsive web applications using React.

EDUCATION

MSc, Computer Science | The Hong Kong University Of Science and Technology, 2012 - 2016
